1980 Editorial Index

All major articles published in Pit and Quarry during the 12-month period beginning with January 1980, and ending December 1980, are here indexed under appropriate subject headings. Plant stories, general articles, and reports of association meetings are in most instances listed under the materials or products principally involved. Articles concerning particular phases of operations are listed under such headings as blasting, drilling, maintenance, etc. The numbers following the months indicate the page on which the article begins.
